Fraser Parrott

Data Analysis and Reporting

Waterdown, ON | jfparrott@gmail.com | linkedin.com/in/fraser-parrott

Summary

Analyst with 5+ years at Intuit turning large datasets into reporting, process improvements and coaching insights, mainly in QuickBase, Google Sheets and Advanced Excel. Designs data-capture tools and dashboards, and uses AI tools (Gemini, Claude) to automate classification and reporting. Trained in SQL, Python and Tableau; explains results clearly to non-technical audiences.

Skills

Analysis & Programming: SQL, Python (Pandas, NumPy, Scikit-Learn), R, statistics, predictive modeling (coursework, projects)
Data & Tools: Advanced Excel, PowerPoint, Google Sheets (formulas, pivot tables, scripts), QuickBase (forms, reports), data validation
Visualization: Google Sheets dashboards, Tableau, Power BI
AI Tools: Gemini, Claude for text classification, summarization and workflow automation

Experience

Tax Analyst

Intuit — Virtual | December 2022 – September 2026

- Designed the QuickBase Quality Review entry form from prior review data so reviewers consistently recorded whether rework was required and why.
- Review data showed who made errors but not why. Used Gemini to classify free-text notes from ~2,500 reviews per season by error type and tax topic, then redesigned the form with a three-level tax-topic taxonomy, standard error definitions and a Process Deviation category.
- Reclassification moved Process Deviation from ~2% to ~10% of reviews and cut the Clerical share by 5–10 points, enabling targeted coaching for ~250 Tax Experts and a product fix to the Northern Residents Deduction entry screens.
- Built Google Sheets dashboards for leadership and reusable weekly report templates for ~15 managers (~250 Tax Experts), cutting turnaround from ~3 days to ~2 hours; adopted by a colleague.
- Used Claude to write Google Apps Script that pulls legislation and budget updates for 14 Canadian federal, provincial and territorial governments into a tracker, cutting a week-plus manual update to one morning.
- Partnered with stakeholders to scope analysis and process improvements; documented complex and rare tax scenarios for preparers.

Tax Service Experience Expert / Senior Supportability Specialist

Intuit — Virtual | February 2022 – December 2022

- Designed and deployed targeted quality-review campaigns end-to-end (ideation, planning, targeting, measurement) aimed at maximizing customer loyalty.
- Conducted post-campaign measurement and customer analysis, delivering data-driven recommendations to training teams.

Senior Tax Expert

Intuit — Virtual | February 2020 – February 2022

- Used performance data to mentor a team of tax preparers and applied advanced analysis to resolve complex client issues.

Tax Professional

H&R Block — Ontario | January 2016 – December 2019

- Taught the Level 1 Tax Course to new preparers and served as office manager at three H&R Block locations.

Financial Consultant, then Executive Assistant (Financial Planning)

Investors Group — Brantford and Cambridge, Ontario | November 2009 – November 2011; July 2012 – March 2013

- Worked as a Financial Consultant, then as Executive Assistant doing financial planning work for a senior Consultant.

Projects

Bank Marketing Campaign Analysis (Power BI, public dataset)

- Built a three-page Power BI report on 41,188 bank campaign contacts, with DAX measures for conversion by month, channel, customer segment and contact count.
- Found 33% of contacts fell in May at 6.4% conversion, against ~46% in the best months on 5% of volume; recommended piloting more cellular contact and capping repeat calls.

Predicting Customer Churn to Drive Retail Loyalty (Capstone)

- Segmented retail customers, built a churn model (85% accuracy) and presented a loyalty-campaign proposal in Tableau.

Education

- Post-Graduate Certificate, Public Administration (Honours) — Humber College, Toronto, ON, 2014
- B.Comm, Sports Administration — Laurentian University, Sudbury, ON, 2009
- B.A., Sociology — Queen's University, Kingston, ON, 2000

Certifications & Courses

- Google Advanced Data Analytics and Google Data Analytics Certificates — Python, SQL, R, Tableau, statistical modeling
- Data Science Infinity — in progress (Python, SQL, machine learning)
